ABOUT ME

Software Engineer graduate from CETYS, Cum Laude, and recipient of the university's top academic honor (Medal of Honor), with 4 years of freelance experience building full-stack applications across diverse industries. Core stack: React, Next.js, TypeScript, Node.js. Professional English (C1).

TECHNICAL SKILLS

Languages *— JavaScript, TypeScript, Python, SQL, Java (academic)*

Frameworks *— React, Next.js, Vue.js, Node.js, FastAPI, Tailwind CSS, shadcn/ui, Electron*

Databases *— PostgreSQL (Supabase), Azure SQL, SQLite, Redis*

Tools & Platforms *— Git, Supabase, Azure Functions, Power BI, Twilio, n8n, Docker*

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Independent 2021–Present

- *Operated as a full one-person dev team — scoping, quoting, developing, and delivering projects — for clients across legal, real estate, faith-based, and hospitality sectors.*
- *Built custom web platforms for clients including an immigration law firm, a real estate agency, a US-based church, and a 2025 Culinary Awards-recognized restaurant, selecting the stack (React/Next.js, among others) to fit each client's needs.*
- *Managed the full client lifecycle from requirements gathering to post-launch support, developing strong technical communication skills with non-technical clients.*

Frontend Developer Intern | Sperantus May–Oct 2024

- *Shipped UI features in Vue.js for a production SaaS product used by international enterprise clients.*
- *Collaborated within an engineering team on an existing codebase — hands-on experience contributing to an established product.*

FEATURED PROJECTS

GreenBlnk / GreenMetric | Linked Project with INESU, CETYS 2025

- *Built a sustainability data platform (React, TypeScript, Azure Functions, Azure SQL, Power BI) for CETYS's Sustainability Institute (INESU), supporting a global accreditation held by fewer than 50 universities worldwide.*
- *Redesigned the architecture mid-project — replaced an evaluation-cycle model with a flat star-schema fact table and migrated data capture from manual Excel uploads to a CRM-style portal.*
- *Led requirements gathering and delivery directly with institutional stakeholders.*

BiblioTrack | Linked Project, CETYS Ensenada 2025

- *Built a desktop app (Electron, React, better-sqlite3) automating entry logging, counting, and reporting for CETYS Ensenada's community library, supporting institutional accreditation.*
- *Implemented a local LAN server for remote dashboard management.*
- *Led requirements gathering directly with library staff, alongside full development and delivery.*

EDUCATION

B.S. in Software Engineering | CETYS Universidad, Ensenada 2021–2026

- *Graduated with a 92.87/100 final GPA, Cum Laude, and awarded the Medalla de Honor — CETYS's highest academic distinction, given to one graduate per program, per generation.*
- *Completed a 6-month international exchange at Korea University (Seoul, 2025), taking business (Globalized Economics) and humanities (Anthropology) coursework in English within culturally diverse cohorts.*

LANGUAGES

Spanish: Native | English: Professional Fluency (C1)
